DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

I- As to claim 7, line 6, the phrase "may be" renders the claim indefinite, because "may be" can be interpreted as unsure.

Claim Objections

3. Claims 7-8,11,13 are objected to because of the following informalities: in claim 7, line 4, "the first end " lacks proper antecedent basis in the claim; line 10, "the axial elements" lacks proper antecedent basis. Appropriate correction is required.

As to claim 8, line 7, "raidally" should be --radially--. Appropriate correction is required.

As to claim 11, line 1, "the coupling" lacks proper antecedent basis in the claim.

As to claim 13, line 7, "disolaceable" should be --displaceable--. Appropriate correction is required

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 8-10,12-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoffman et al. 5,002,537.

Hoffman et al. disclose an injection device (2), which comprises an axial element (50) into which a cartridge (4) of medication can be mounted, a cartridge holder (66), the axial element being radially expandable at least at one end (col. 4, ll. 6-16), a rotatable ring (72), the ring coupled to the axial element so that when the ring rotates the axial element moves axially (col. 4, ll. 4, ll. 59-67), and wherein when the axial element is moved in a distal direction at least a portion of the axial element expands radially to allow the cartridge to be placed into the injection device or removed therefrom (col. 4, ll. 59-68 onto col. 5, ll. 1-20).

The device shown by Hoffman et al. will perform the method recited in claim 12 during normal operational use of the device.

Allowable Subject Matter

6. Claim 7 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

7. Claims 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

8. Applicant's arguments filed 12/15/2004 have been fully considered but are moot in view of the new ground(s) of rejection.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
